# PROTECHNIC

## AUTOMOTIVE

An expanding range of excellent technical aerosols. Developed specifically to be the very best formulation and give the user the best performance, these sprays will rival the performance of the likes of Rocol, Ambersil, WD40 and Action Can.

Choose from a range of box sizes and products including contact cleaner, degreaser, chain lube, foaming cleaner, mould release, open grease lube, penetrating oil, white grease and zinc spray. All made in the UK.

## Penetrating Oil

Any mechanical device containing fixings such as nuts and bolts can be prone to the effects of rust and grime and these corrosive substances can cause seizures which often result in time consuming costly repairs and part replacements. Protechnic Penetrating Oil is a fast acting penetrating oil that ensures smooth running machinery and prevention of further corrosion. Protechnic Penetrating Oil breaks down rust and removes grease, dust, dirt and sludge. It is an essential tool for garages and workshops, suitable for use on gauges, instruments, locks, and power tools and can aid maintenance of plumbing and pipework. Protechnic Penetrating Oil is silicone free and is safe to use on paint work.

### Key features

Specially designed to penetrate the most inaccessible areas and to repel water, moisture or damp.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Yellow

Odour: Solvent

## White Grease

Protechnic White Grease creates long-lasting lubrication and protection. It can be applied as grease lubrication on highly-stressed bearings, spindles and guides in machines. However, it can also be applied as a long-lasting lubricant. It prolongs the intervals after which lubrication becomes necessary owing to its double lubricating effect. It ensures longer functioning of expensive installations with fewer failures and repairs.

### Key features

Lubricates moveable parts and sliding surfaces. A back-up lubricating grease on spotless lubricating points. Reduces wear and tear on bearings, shafts, chains, chain wheels, brake hinges and locks. Suitable as a battery pole grease, a parting agent and preservative. Long-term resistance to salt water. Temperature resistant from  $-30^{\circ}\text{C}$  up to  $+120^{\circ}\text{C}$  (for a short period of time). Prevents rust formation. Adheres extremely well. Saves the costs of maintenance and lubricants by reducing the number of failures and repairs.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: White/Creamy

Odour: Solvent

## Foaming Cleaner

Protechnic Foaming Cleaner for all glass and smooth surfaces. High performing active cleaning foam. Highly active, molecular cleaning agents are released to directly remove the dirt. Outstanding dirt dissolving power. Dissolves insects, bird droppings, road traffic film, rubber residue, grease, silicone and nicotine from glass surfaces, mirrors and paintwork around the home, vehicles and workplace.

### Key features

Cleans interior and exterior glass. It can remove insects, dirt and road film from windscreens, body glass, headlights and mirrors. It also leaves a water-repelling coating behind, improving visibility in wet driving conditions.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: White Foam

Odour: Solvent

## Contact Cleaner

Protechnic Contact Cleaner blasts away oil, dirt, flux residue and condensation from sensitive electronics and electrical equipment with pinpoint precision. Dries quickly, leaves no residue and removes more soil than leading competitors. Ideal for use on printed circuit boards, controls, switches, precision instruments and electric panels. Improves performance by preventing contact failures or malfunctions. Test on sensitive materials before use. Do not use on energised or sensitive electrical equipment. Removes tarnish, dirt, grease, dust, oil and other deposits. It prevents arcing between dry contacts ideal for cleaning ignition components and other precision parts.

### Key features

Removes dust, grease, oxide deposits, tobacco residues, oil and other surface contaminants. It can be used safely on ECU's. It cleans switches, contacts, circuit boards, tape heads, guides, and read/write heads. It is also an excellent CD/DVD cleaner. Dielectric strength 33.8kv.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Clear Liquid

Odour: Alcohol

## Open Gear Lube

Protechnic Open Gear Lube is based on premium grade mineral oil incorporating solid lubricants, extreme pressure additives, and a blend of antioxidants and corrosion inhibitors, combining to provide highly effective lubrication with excellent corrosion protection. Protechnic Open Gear Lube has been specially developed for the lubrication of all types and sizes of open gears.

### Key features

This product is reinforced with bitumen for use on heavy duty gears and chains. Protechnic Open Gear Lube remains viscous and tacky, penetrating and coating working parts with a long-lasting protective, lubricant coating.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Black Grease

Odour: Solvent

## Chain Lube

Protechnic Chain Lube is an advanced lubricant that sets a new standard in chain lubrication. It has been developed to prevent corrosion by imparting a uniform layer of oily film that protects from aggressive agents and resists fling-off and water wash out.

### Key features

Lubricates and penetrates cables, linkages, hinges and catches. It can be used on both metal and plastic applications. It both reduces wear and tear and increases the lifespan of these components.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Amber Grease

Odour: Solvent

## Cleaner Degreaser

Highly active special cleaning agent with intensive cleaning effect for oily and greasy machine parts, disc brakes and brake parts, such as brake plates and clutch linings. Protechnic Cleaner Degreaser is acetone-free.

### Key features

An optimal cleaning effect within a short space of time. Works without leaving any residues. Removes even hardened lubricants. Not corrosive and does not attack rubber or plastic parts.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Clear

Odour: Solvent

## Mould Release

Instant high gloss releasing agent spray which can be used in a multitude of applications. It is both oil and fat free enhancing its good lubricant and releasing agent capabilities. It provides protection from oxidisation and corrosion and may be used to repel water. It also has excellent high temperature and electrical resistance.

### Key features

Instant high gloss. Protects from oxidisation and corrosion. Repels water. Excellent electrical resistance. Working temperature range -50°C – 250°C.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Colourless  
Odour: Solvent

## Zinc

Protechnic Zinc is the effective and fast way to touch up galvanised structures. This zinc galvanise is a zinc-rich paint that provides a combination of rapid drying time, superior coverage, opacity, and protection against corrosion. It is an accurate colour match for newly galvanised steel and is ideal for protecting welding joints and cut ends.

### Key features

Rapid drying time: Touch dry in 2 mins. It can be used as both primer and top coat. Excellent substrate adhesion and flexibility.

### Aerosol size

400ml (65mm d x 198mm h including cap)

### Physical properties

Appearance: Silver

Odour: Solvent
